functioned as it should, website  
navigation was easy to use.

Report: I am very grateful for  
the possibility to use thumbs  
for a period of two days; many  
thanks to the developers. First  
time using the software and it

---

works very well and I'll use it often. Report: I like the fact that it will only download the original file but will not extract it. Very nice. Report: I would recommend this product if you want to create thumbnails for your webpages. Report: I used ThumbItAll to create thumbnails on a single PC and

---

it worked fine, then used it on another computer, worked fine too. Report: The program made thumbs from the files correctly and with no difficulties. That is what we wanted, to be able to make thumbs from files.

Report: While using the program I encountered only a few problems. I did not notice

---

that the program used the file size of the original file (or any other information about the file) in the generated thumb.
